

## **Roles of leaders in CubeSat Project**

Team leader:

- Coordinates the initial discussions of the groups to identify the mission's tasks
- Organise the presentation of the projects for the CubeSat mission by each group

Sub-Team leaders (one for engineering, one for experimental investigations):

- Responsible for the development of each of the investigations
- With project leader, monitors the progress of each group
- Assist in the presentation of their group's project to the whole group.
