

Using Technology in the Classroom

A free Educators' Workshop in conjunction with the
International Astronautical Congress (IAC)

Saturday September 27th 2014, 9 am—4:30 pm
Metro Toronto Convention Centre
Toronto, Canada

Keynote Speaker: Dr Matt Kuhn

Mid-continent Research for Education and Learning
(McREL)

Teachers: Control the Parkes Radio Telescope!

The chance of a lifetime to observe pulsars.

PULSE@Parkes: Learn how high school students use the **64m Parkes Radio Telescope in Australia** to observe pulsars with Dr George Hobbs (CSIRO radio astronomer) & Rob Hollow (CSIRO education officer). This is your chance to take control of this world class instrument. The website of the Parkes telescope is <http://www.parkes.atnf.csiro.au/>

Serious Games: investigate use of serious games in the classroom and how they can be integrated into an effective lesson.

The IAF, in conjunction with the International Space Education Board, invites teachers to register for this workshop. Download an application form from

<http://www.vssec.vic.edu.au/resources/professional-learning/iseb-iac-toronto-educators-workshop/>

Enquiries: ian.christie@vssec.vic.edu.au

Applications close Friday 12th September
